

## AN EVOLVING BUSINESS

Along with the evolving mission, Tekmicro is evolving its business to better serve customers throughout the entire program lifecycle for Domestic Programs, Foreign Military Sales (FMS) and Direct Commercial Sales (DCS). Our management team has been restructured, bringing together decades of expertise in defense electronics to refresh products and processes. Together we are driven to provide innovative solutions, streamlined execution, and superior quality.

As a small business that augments our customers engineering expertise, we are affordable and agile. We have a business model that leverages a partner ecosystem to bring together large scale capabilities, and the intimacy of working with a small business. Tekmicro can scale with you while always remembering why we do what we do.

Our investment in engineering I/O and FPGA processing technologies that are used across programs provides affordable capabilities to our customers while reducing program specific NRE. We understand that each program has unique challenges, and therefore Tekmicro provides services that help our customers get their job done. Affordability, speed, and agility make Tekmicro a competitive advantage for our customers and our warfighters.
